DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on October 27, 2005 has been entered.

Allowable Subject Matter

2. Claims 14, 16-17, and 27-29 are allowed.
3. The following is an examiner's statement of reasons for allowance: This invention deals with a data cable comprising an interior support being unshielded wherein the support has a cylindrical longitudinal extending central portion, a plurality of projections extending from the central portion; each projection of said plurality of projections being adjacent to two other projections of said plurality of projections, said plurality of projections forming a plurality of adjacent projections; an open space defined by each of said plurality of adjacent projections; said cable covering contacting each projection; only one twisted pair conductor from said plurality of twisted pair conductors disposed in each open area space; and wherein said cable covering includes an overall shield

(claim 14). This invention also deals with a data cable comprising an interior support being unshielded wherein the support has a cylindrical longitudinal extending central portion, a plurality of projections extending from the central portion; each projection of said plurality of projections being adjacent to two other projections of said plurality of projections, said plurality of projections forming a plurality of adjacent projections; an open space defined by each of said plurality of adjacent projections; said cable covering contacting each projection; only one twisted pair conductor from said plurality of twisted pair conductors disposed in each open area space (claim 27). The above stated claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments filed June 6, 2005 and October 27, 2005 have been fully considered and they are persuasive. Specifically, the applicant's argument in the Declaration filed under 35 USC 1.132, stating it would not have been obvious to one of ordinary skill in the art to substitute the twisted pairs of Tessier into the cable of Arroyo which is designed to isolate optical fibers from compressive forces caused during installation and bending of the cable is persuasive and therefore the claims have been allowed. Specifically, since optical fibers don't suffer from crosstalk, there would be

need to modify the cable of Arroyo to comprise twisted pairs for the purpose of reducing crosstalk.
